

IAT Insurance Group's broad capabilities and national access helps our program partners achieve a sustainable competitive advantage for unique insurance products and specialty markets. We welcome a wide array of business segments and can facilitate capacity for new or existing markets.

Our customized solutions and diverse distribution channels make IAT a prime market for specialty insurance programs. We provide primary MGA programs, alternative risk transfer solutions, risk sharing and fronting arrangements.

Our unbundled service model allows you to use TPAs and loss control providers (or in-house capabilities) that are most appropriate for the classes of business you write and your geographic footprint. Our claims and risk control experts provide oversight to ensure the continued quality of these services. We also provide flexible data integration with your policy and claims systems (proprietary or vendor-based) in order to drive efficiency and enable business intelligence analysis.

Create and manage a carrier partnership that allows you to build and grow a specialty program in accordance with your business needs. We provide tailor-made products and solutions to create the maximum competitive edge.

IAT Insurance Group operates through eight domestic companies on an admitted and non-admitted basis in all 50 states.
